

The past few years have seen the end of commercial radio as we know it. Gone are the days of local programming, independent dj's, loose playlists, and many other things that made me love radio as a child thru my adulthood. Now that is all gone. Replaced by mega multinational corporations only interested in the bottom line. Now comes a new proposal to further consolidate what should be a public trust into the hands of still fewere mega corporations. I urge you to stop this madness. If this process continues we will have one company owning all the TV, radio & newspaper outlets in this country. I find this dispicable.

VOTE NO to this change in ownership rules.
